Re: Annual Reevaluation of Incidents and Camera Locations for 2024

On January 7th, 2025 the annual reevaluation of incidents and camera locations was completed pursuant to CALEA Standard 91.1.7(a), Standard 91.1.7(f) and General Order 12.6.2 – Camera Locations, which states: Technical Services will conduct an annual evaluation of the camera locations and the incidents that have occurred. A recommendation for changes will be included in the annual inspection report.

Major accomplishments during this review period

In 2024, 40 cameras were added to locations across campus that will improve visibility in areas that include administrative, academic, and parking. We were able to update our coverage from the 2023 evaluation, specifically parking services are working to convert their analog cameras to IP cameras which will be a drastic improvement. Design and construction have added cameras to locations in the EUC connector and Moran commons to compensate for the library construction. ITS worked to overall their cameras within classrooms. Half of the classrooms were updated in 2024, and the other half will be updated in 2025. We were able to add a camera location on Oakland Avenue which has been in the works for several years.

Evaluation of the camera locations and incidents that have occurred

UNCG has over 1,200 cameras located across academic, residential, and open areas that allow for vast coverage of campus. The current infrastructure has proven to be effective in identifying when incidents occur and being able to take appropriate action with that information. Based on locations of incidents occurring on campus, we have good camera coverage.

Recommendations for future changes

We are working to improve on the following:

- Work with ITS to have adequate coverage in all ITS lab spaces.
- Improve visibility around daycare centers on campus.
- Improve visibility on Oakland Avenue to view pedestrian and vehicular traffic.

- Continually update camera client and server software.
- Work with ITS and Facilities Design and Construction on cameras location and implementation during library renovation.
- Work with ITS and Facilities Design and Construction on camera location and implementation for the new Performing Arts Center to be located at Tate Street and Gate City Blvd.

The next annual review for the year 2025 is scheduled for January 2026.
